Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 31 October 2007 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-3 and 5-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Yasuda (5999694).

Regarding claims 1 and 5, Yasuda discloses an information processing apparatus (Fig. 1) comprising: generating means for generating one or more Playlist files specifying a sequence of reproducing information recorded on a recording medium, and generating a management information file supervising said one or more Playlist

files (Figs 7); and

recording means for recording said one or more PlayList files and said management information file, on said recording medium (Fig. 14, column 23, lines 15-25, column 24, lines 45-68) said management information file containing a resume PlayList file name information (file identifier)) which that indicates a name of a particular PlayList file whose playback has been terminated (Fig. 8, column 1, lines 5-15, column 18, lines 39-45);

said particular PlayList file containing temporal information on a time point (time code TC) of the termination of the playback (stop reproduction) of the particular PlayList file (column 3, line 45 to column 4, line 10); and

Further for claim 5, Yasuda teaches control means for controlling a playback of the main information on said recording medium based on said management information file containing a resume PlayList file name that indicates a name of a particular PlayList file whose playback has been terminated, said particular PlayList file containing temporal information on said time point the termination of the playback of the particular PlayList file (column 3, line 45 to column 4, line 10, column 14, lines 35-55, column 16, lines 55-67).

Method claims 2,3 , 6 and 7 correspond to apparatus claims 1 and 5, therefore method claims 2,3,6 and 7 is rejected by the same reason as applied to apparatus claims 1 and 5.

Further for claims 3 and 7 Yasuda further teaches a computer readable medium executed by a processor since the processing apparatus of Yasuda used instructions

stored in a medium and read by a processor (controller 8) to control the processing of the apparatus (Fig. 1).

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HUY T. NGUYEN whose telephone number is (571) 272-7378. The examiner can normally be reached on 8:30AM -6:00PM.
